È l'unico prezzoario specifico dedicato alle tipologie edilizie necessario per capire quanto costa costruire al metro quadrato e al metro cubo a seconda della destinazione dell'edificio. È strumento fondamentale per individuare gli elementi di costo comprensivi delle spese generali e degli utili di impresa ad esclusione degli oneri di urbanizzazione e dei terreni per stime di massima del costo di costruzione, programmazione economica degli interventi, perizie e consulenze tecniche per lavori di costruzione e ricostruzione degli immobili, studi di fattibilità dei progetti, comparazione dei costi di costruzione con i valori commerciali degli immobili. È essenziale per l'asseverazione sulla congruità della spesa sostenuta, congruità dei prezzi necessaria per usufruire degli incentivi fiscali. L'edizione 2024 di prezzi tipologie edilizie a cura del collegio degli ingegneri e architetti di Milano, pubblicato da oltre 35 anni, conferma la propria funzione di insostituibile strumento di lavoro per le imprese, i professionisti e i funzionari tecnici della pubblica amministrazione. Fornisce infatti la più vasta documentazione informativa puntuale ed esauriente sui costi parametrici di costruzione di edifici a diversa destinazione, espressi al metro quadrato e al metro cubo, dopo la pausa imposta dalla pandemia. L'edizione 2024 è stata aggiornata e arricchita: registra infatti nel dettaglio tutte le variazioni dei costi di costruzione verificati dalla commissione istituita presso il collegio degli ingegneri ed architetti di Milano. Attraverso l'analisi dei singoli costi e l'applicazione delle varianti ufficiali pubblicate per disposizione del ministero dei lavori pubblici, amplia la panoramica di tipologie presenti, inserendone di nuove. Sono riportati i prezzi per edilizia residenziale di tipo medio economico di pregio e monumentale, uffici, centri commerciali, complessi alberghieri, scuole e università, edifici di culto, edifici industriali, parcheggi, giardini e spazi pubblici. Un'altra novità di rilievo è il riconoscimento del prezzoario tipologie edilizie quale strumento essenziale per l'asseverazione sulla congruità della spesa sostenuta, congruità dei prezzi, attestazione necessaria a seguito dei vari decreti e incentivi fiscali, i molteplici bonus edilizi per l'adeguamento energetico e sismico del patrimonio edilizio esistente.

Le finalità di questo libro sono sintetizzabili nella volontà di fornire agli studenti dei corsi di produzione edilizia gli strumenti tecnici e gestionali per migliorare le proprie conoscenze ed essere capaci di interfacciarsi meglio con essi. Le tematiche trattate contengono due anime: la prima rigorosa in termini metodologici, ma di semplificazione scientifica; la seconda riguarda l'esplicitazione del metodo, rendendolo idoneo ad essere applicabile in più scenari. Saranno insomma scelti quei metodi più compatibili con le reali esigenze e condizioni dei vari operatori, piuttosto che illustrare lo stato d'arte scientifico. Ma, astratto il libro, fornisce la visione di insieme dei vari livelli necessari alla definizione programmatica, progettuale e contrattuale, necessariamente divisa in capitoli, ma che in realtà rappresentano le diverse sfaccettature della fase di progettazione complessiva d'intervento. Tratta gli argomenti relativi alla prima parte del processo di definizione dell'intervento, accompagnandolo fino alla fase di trasferimento nel luogo di costruzione.
